

## Newsletter February 2010

### The beginning of a new era in motorsport clothing...

KLIM Technical Riding Gear introduces the Adventure Rally Suit.

In cooperation with Gore-Tex® (USA) and Adventure Spec (UK) Klim has developed the Adventure Rally Suit. The result of this unique collaboration of specialists is outstanding: high tech motor clothing with the latest technologies incorporated.

The concept was tested at various rallies by experienced riders. Thousands of miles were clocked. Each component was subjected to extreme use and critically evaluated. In January 2010 a number of U.S. and British riders, including Jonah Street, participated in the Dakar Rally with this innovative suit. This exclusive product is now available in the Netherlands.

### Camelbak

The first CamelBak products proved to be very popular among mountainbikers and motocross riders in the US, because it allowed them to drink without taking their hands off the handlebars in technical terrain.

Dehydration hinders your performance. Your body may even overheat.

During physical exertion or with high temperatures your body temperature will rise, you start sweating to cool. The sweating causes a fluid deficiency which should be replenished, otherwise you will become overheated.

With a Camelbak you can prevent dehydration.
